

SOUNDLOCK

STEP 1:

Insert the handle in the top of the **SOUNDLOCK**.

STEP 2:

Drill the **SOUNDLOCK** into the ground until the orange top is the only part over ground. Drill with a downward pressure, and add water to the soil if dry.

STEP 3:

Remove the handle.

STEP 4:

Attach the steel wire to the object you want to lock. Put the padlock through the wire loops and lock it to the hooks in the orange tops.

STEP 5:

Store your handle in a safe place and keep hold of the key. Enjoy your surroundings without worries.
